1- Most people think that getting solar on your roof is expensive, however the truth is, the cost of solar has dropped dramatically over the last two decades making solar more affordable than ever.

Electric rates are increasing, so lower solar costs and higher utility rates have improved the return on investment and payback. Contact me to learn more!

2- If you've been thinking about going solar, but the upfront cost has been holding you back, Prime Choice Solar has a solution for you!

I am dedicated to helping homeowners make the switch to solar as easy and affordable as possible. With our no-upfront-cost solar program, you can get solar panels and start saving money on your energy bills right away, while also doing your part in reducing your carbon footprint. Contact me today to learn more about this exciting opportunity!

3- Attn: California Homeowners! Go Solar Before It's Too Late! Beginning 4/15/23, the California Public Utilities Commission voted to reduce solar savings by 60%. Get solar before April to be grandfathered in for 20 years of savings! Make the switch to solar today! I am here to help!

4- Going solar can have a huge impact on your monthly utility bill. By generating your own clean energy, you can save on energy costs and reduce your reliance on traditional, expensive electricity sources. Plus, with government incentives and tax credits, the switch to solar has never been more affordable. Start saving on your utility bill and making a positive impact on the environment - go solar today! Please reach out to me to learn more.

5- Inflation can be a real pain, especially when it comes to your monthly electricity bill. But it doesn't have to be that way! By switching to solar power, you can save on energy costs and protect yourself from the effects of inflation. Plus, using solar power is better for the environment and can help combat climate change. So don't get burned by rising electricity costs - go solar and save! Reach out to me today!

🏠 Adding solar power to your home can have many financial and environmental benefits. Not only can solar panels reduce or eliminate your electric bill, but the investment can also increase property value.

⚙️ Contact me today to learn more about some of our financing options and how I can help you start saving money with solar!

9- According to Zillow, homes with solar panels sell for approximately 4 percent higher on average than homes without solar energy. This added value allows sellers and real estate agents to increase the asking price for a home. Buyers benefit from an energy-efficient home, and sellers can profit from an increased resale value.

10-

☀️ Solar is now less expensive than traditional power, and with enough decades of proven field time, it is the #1 new energy technology powering homes across the Nation.

🚀 As the price of electricity increases every year in America, more homeowners are looking for alternative ways to save on their electric bill.

📱 Through a solar power system, you can lock in your price point for power. With solar panels you will be generating passive power at no cost for the entire lifespan of your system. Even if you don't produce 100% of the power you eventually consume, solar can.
